NAYANA S PARTHAN

Full Stack Developer | AI/ML Developer
9961194496 | nayanasparthan@gmail.com | Thiruvananthapuram, Kerala, India

PROFESSIONAL SUMMARY

Passionate and result-driven Full Stack Developer with strong expertise in Java, Spring Boot, React.js, and modern web technologies. Proficient in building scalable, user-friendly applications with solid knowledge of API integration, database management, and backend optimization. Complementary expertise in AI/ML with hands-on experience in machine learning models, data analysis, and predictive systems. Adept at working in collaborative, agile environments while maintaining high code quality standards. Enthusiastic about learning emerging technologies and solving complex technical challenges. Keen interest in AI-driven healthcare solutions.

PROFESSIONAL EXPERIENCE

Full Stack Developer
IPCS Global, Thiruvananthapuram, India | May 2025 – Present

Key Contributions:

- Built and deployed end-to-end full-stack applications using Java, Spring Boot, React.js, and MySQL
- Designed and implemented dynamic UI components with HTML5, CSS3, and React.js; styled applications using Bootstrap 4 & 5
- Implemented comprehensive user authentication, CRUD operations, and responsive dashboards with real-time data synchronization
- Collaborated effectively with cross-functional teams following Agile methodology and sprint cycles

Java Programmer
Mynute Innovations, Thiruvananthapuram, India | Nov 2023 – Apr 2025

Responsibilities:

- Designed and developed responsive web applications using Spring Boot, React.js, Hibernate, and modern MVC architecture
- Created and consumed RESTful APIs for seamless internal and external system integrations
- Utilized Postman API for comprehensive endpoint testing, debugging, and API documentation
- Collaborated closely with design and QA teams to ensure code quality, functionality, and user experience excellence
- Participated in agile sprints, systematic bug fixing, and continuous integration pipelines using Maven and Gradle
- Optimized application performance and reliability by refactoring code and writing efficient SQL queries

AI/ML Developer
StackUp Learning Hub, Technopark, Kazhakkoottam, Thiruvananthapuram, India

Key Contributions:

- Developed and implemented machine learning solutions with focus on data preprocessing, visualization, model building, and predictive analysis
- Gained hands-on expertise in machine learning algorithms, data analysis, and Python programming through practical, production-oriented projects
- Developed comprehensive knowledge in advanced data preprocessing techniques and exploratory data analysis (EDA) methodologies
- Applied AI solutions to solve real-world problems with continuous technical improvement and innovation

PROJECTS

Medicus App – Healthcare Management System

Technologies: Java, Spring Boot, React.js, MySQL, Hibernate, REST API

- Developed a comprehensive healthcare management application to streamline clinic operations and patient care workflows
- Implemented appointment scheduling, patient registration, and real-time doctor availability modules
- Built robust RESTful APIs enabling seamless communication between React.js frontend and Spring Boot backend
- Designed responsive user interfaces using React.js, HTML5, CSS3, and Bootstrap for optimal user experience
- Integrated comprehensive database operations using MySQL and Hibernate/JPA for reliable data persistence

Drugs Management System (DMS)

Technologies: Java, Spring Boot, MySQL, HTML5, CSS3, JavaScript

- Created a comprehensive web-based system for managing pharmaceutical drug records and inventory
- Implemented complete CRUD operations for drug details, stock management, and expiry date tracking
- Ensured data accuracy and optimized backend processing using Spring Boot with efficient query design
- Designed intuitive and user-friendly interfaces for efficient data management and reporting

Diabetes Prediction System

Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

- Developed a predictive machine learning system to classify diabetes risk using advanced classification algorithms
- Implemented DecisionTreeClassifier and RandomForestClassifier models with comprehensive model evaluation
- Performed thorough data analysis and visualization using Pandas, NumPy, Matplotlib, and Seaborn libraries
- Evaluated model performance using confusion matrix, accuracy scores, and detailed classification reports

Titanic Survival Prediction System

Technologies: Python, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

- Built a classification model to predict passenger survival outcomes using historical Titanic dataset
- Performed comprehensive data preprocessing and exploratory data analysis (EDA) for dataset optimization
- Evaluated model accuracy using confusion matrix, accuracy metrics, and classification reports

To-Do List Web Application

Technologies: HTML5, CSS3, JavaScript

- Developed an interactive task management web application with intuitive user interface
- Implemented full functionality including add, edit, delete, and mark-complete task operations
- Designed responsive UI with clean layouts, modern styling, and smooth animations

EDUCATION

Master of Science (M.Sc.) in Computer Science
Indira Gandhi National Open University (IGNOU) | Jan 2026 – Present

Bachelor of Science (B.Sc.) in Computer Science
IHRD College of Applied Science, Kundara, Kollam, India

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, JavaScript

Frontend: React.js, HTML5, CSS3, JavaScript, Bootstrap 4 & 5, Angular

Backend: Java, Spring Boot, Quarkus, REST API, Microservices

Database & ORM: MySQL, Hibernate/JPA

AI/ML Technologies: Machine Learning, Artificial Intelligence, Deep Learning Basics, Predictive Analysis

Python Libraries: Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn

Data Analysis & Visualization: Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Data Visualization

ML Algorithms: Linear Regression, Decision Tree, Random Forest, Classification & Regression Models

Tools & Frameworks: Postman API, Maven, Gradle, Git, GitHub, VS Code, Jupyter Notebook, IntelliJ IDEA

Cloud & DevOps: AWS Basics, Kubernetes Basics, CI/CD Pipelines

Soft Skills: Problem Solving, Team Collaboration, Communication, Agile Methodology, Quick Learning, Analytical Thinking, Project Management

Architectural Concepts: MVC Architecture, Object-Oriented Programming (OOP), Microservices Architecture

LANGUAGES

English (Professional Working Proficiency) • Malayalam (Native) • Hindi • Tamil

DECLARATION

I hereby declare that the above information is true to the best of my knowledge and belief.
